How to Solve

Each puzzle is a grid of math equations that read across and down and cross at shared numbers.

1. Find the shaded empty cells — these are the blanks to fill in.
2. Use the numbered “Fill the blanks using” list beside each puzzle.
3. Place each value so that every across and down equation is true.
4. Use the work area to figure out your answers.

Check your work with the answer key at the back, or scan the puzzle’s QR code to solve it online.
